SUMMARY

Dynamic software developer with expertise in Android application development and a strong track record of creating innovative and user-friendly solutions. Demonstrated ability to manage projects from concept to completion, with a focus on delivering high-quality, efficient, and reliable software. Proven skills in problem-solving, collaboration, and adapting to evolving technologies.

EXPERIENCE

Intern

Indian Oil Corporation Limited

December 2023 - January 2024, Guwahati

- Developed a book store website using the MERN Stack
- Implemented inventory management and authentication features
- Demonstrated effective project management and problem-solving skills

PROJECTS

Weather App

Personal • November 2024 - December 2024

- Developed an Android app to provide real-time weather information for various locations. The app fetches weather data from a public API, displays current weather conditions, and allows users to search for weather updates by location.

News App

Personal • July 2024 - August 2024

- Developed an Android app using Kotlin and XML for UI design. Utilized Room for local data storage, Retrofit for network calls, and Dagger Hilt for dependency injection. Implemented data preferences for user settings and Paging for efficient data loading.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Kaziranga University • Jorhat, Assam • 2025 • 7.72

CERTIFICATIONS

Cisco-Junior Cybersecurity Analyst Career Path

2025

- Gained expertise in mitigating security threats, recommending cybersecurity controls, and conducting risk assessments. Demonstrated ability to contribute effectively as a network security professional.

CISCO- Introduction to Cybersecurity

2024

- Acquired foundational knowledge of cybersecurity principles, threat detection, and risk mitigation strategies. Developed skills to safeguard systems and data, enhancing understanding of secure software development practices.

SKILLS

Programming Languages: Kotlin, Java, SQL

Mobile Development: Android Studio, Jetpack Compose, XML

Software Architecture: MVVM, Clean Architecture

Data Management: SQLite, Room, Shared Preferences, DataStore

Networking: Retrofit, RESTful APIs, JSON Parsing

Dependency Injection: Hilt

Asynchronous Programming: Coroutines

Tools & Technologies: Git, GitHub, Gradle, Firebase, Google Play Services

Communication Skills: Public Speaking, Effective Communication
